Carbon Capture Technologies (CCT) Program
Final Public Report

Insert Project Name - As per application

Building / Facility or Site Name	
Location (Suburb and State only)	
Project Description	*As per application*
Project Collaborations, including international engagements	*As per application*
Any verifiable carbon dioxide abatement or removal achieved	
Total Project Cost (provide details of what type of costs are included/not included)	$
Total Project CCT Grant Funding	$
Project Started	*Date*
Project Completed	*Date*

Executive Summary:
(Insert 2-4 sentence summary of the project)

Project Objectives:
(Insert 2-4 sentence summary or 2-4 dot points. This can include technology development, reduction in costs and wider benefits from your project, including decarbonisation opportunities for hard-to-abate sectors)

Project Outcomes:
(Insert 2-4 sentence summary or 2-4 dot points. This can wider benefits from your project, including creating additional options for emissions abatement and removal from hard-to abate sectors)

Key Research, Development and Demonstrations Activities undertaken:
(Insert 2-4 sentence summary or 2-4 dot points)

Key challenges:
(Insert 2-4 sentence summary or 2-4 dot points. This can include any technical challenges or risks that the project faced and how they were resolved.)

Lessons Learnt:
(Insert 4- 8 sentence summary or 4 - 8 dot points. Consider what you would want to know before commencing a similar project and what you might do differently. This can include lessons about technology and/or commercial readiness, supply chains, workforce skills and development, unexpected benefits and downsides.

If relevant - If actual project outcomes did not align with the original expectations, please explain why:
(Insert 2-4 sentence summary or 2-4 dot points. This can include factors beyond the project and future plans to achieve emissions abatement or removal)
