CRC for Mining Technology and Equipment	49		

Background

The Cooperative Research Centres (CRC) Program was officially launched in 1990 with the first CRC Grants established in 1991. The CRC Program provides grant funding to support industry-led collaborative research partnerships working on industry-identified problems to improve the competitiveness, productivity and sustainability of Australian industries. It is a well-regarded and long standing competitive, merit-based program.

The CRC Program aims to lift levels of industry-research collaboration to assist in supporting science, research, and commercialisation; and enable growth and productivity for globally competitive industries.

The CRC Program has two streams:

- **CRC Grants** support medium to long term industry-led collaborations for varying periods of up to 10 years. There is no limit set on funding for CRCs and they must have at least one Australian industry entity and one Australian research organisation as partners.
- **CRC Project grants** support short term industry-led collaborations for up to a maximum of three years. Funding is capped at \$3 million, with a minimum funding amount of \$100,000, and they must have at least two Australian industry entities (at least one must be an SME) and one Australian research organisation as partners.

Through the CRC Program, new technologies, products and services are being developed, new and global markets are being accessed, and by investing in research and development, businesses are increasing their income, competitiveness and productivity. CRC Grants are building capability and capacity for industry through targeted education and training activities.

The CRC Program has been evaluated several times since it was established. After each evaluation, the Government of the day has renewed its commitment to funding the program, sometimes with changes to the objectives and features of the program. The following summary details all of the CRC Grants announced since 1991 including their name, period, funding amount, objective and previous iterations, where relevant.

Further information

List of all CRCs over time

The following table provides a list of all CRC Grants announced since 1991 including the CRC name, period of operation, funding amount, objective and previous iterations, where relevant.

CRCs OVER TIME					
No.	CRC	Period	Funding (\$m)	Objective	Previous iterations (where relevant)
238	Solving Plastic Waste CRC	2024-2034	40.00	To transform the way plastic products are designed, manufactured, used, recovered, and recycled, and how microplastic soil pollution is remediated.	N/A
237	CRC for Zero Net Emissions from Agriculture	2024-2034	87.00	To develop, de-risk and scale technologies needed to reduce methane emissions from grazing cattle and sheep, and develop strategies to reduce broadacre and horticulture value chain emissions and accelerate Australian agriculture's transition to net zero and beyond by 2050.	N/A
236	CRC for Solving Antimicrobial Resistance in Agribusiness, Food and Environments	2022-2032	34.50	To bring an industry-facing, multi-sector, One Health response to solving the antimicrobial resistance challenges posing a growing threat to Australia's food, agribusiness, and environmental sectors.	N/A
235	ONE Basin Cooperative Research Centre	2022-2032	50.00	To grow the competitiveness and resilience of Australia's irrigation regions as a high-value and sustainable source of food and fibre for the world.	N/A

OFFICIAL

No.	CRC	Period	Funding (\$m)	Objective	Previous iterations (where relevant)
234	Australian Composites Manufacturing (ACM) CRC	2022-2032	69.90	To reposition Australian manufacturing and sovereign engineering capability to capture emergent markets.	<ul style="list-style-type: none"> Previously named the Sovereign Manufacturing Automation for Composites (SoMAC) CRC.
233	Digital Finance CRC	2021-2031	60.00	To address and commercially exploit the opportunities arising from the transformation of financial markets through the digitisation and direct trading of assets between entities.	N/A
232	Heavy Industry Low-carbon Transition CRC	2021-2031	39.00	To develop and demonstrate the technologies needed to transform Australia's heavy industry to compete in the low-carbon global economy for carbon-neutral materials such as green iron, alumina, cement and processed minerals.	N/A
231	Marine Bioproducts CRC	2021-2031	59.00	To develop new culture systems for seaweeds, microalgae and marine animals; develop advanced manufacturing technology to extract compounds from marine organisms; and produce high value products for export markets.	N/A
230	Future Energy Exports CRC	2020-2030	40.00	To execute cutting-edge, industry-led research, education and training to help sustain Australia's position as a leading LNG exporter, and enable it to become a leading global Hydrogen exporter.	N/A
229	CRC for Transformations in Mining Economies	2020-2030	29.50	To drive transformational change to enable regions and communities to transition to a prosperous and sustainable post-mine future.	N/A

No.	CRC	Period	Funding (\$m)	Objective	Previous iterations (where relevant)
228	Race for 2030 CRC	2020-2030	68.50	To lead collaborative research and innovation to reduce costs to business, enhance reliability, cut carbon emissions, improve energy affordability and develop Australian energy technology businesses.	N/A
227	SmartCrete CRC	2020-2027	21.00	To develop fully integrated product development and systems capability, from research proof-of-concept to commercial production stage, that is ready to roll-out and will lead to Australian competitiveness in Design Engineering and Advanced Manufacturing.	N/A
226	Building 4.0 CRC	2020-2027	28.00	To develop an internationally competitive, dynamic and thriving Australian advanced manufacturing sector for the building industry to address the challenges of productivity, housing affordability, ecological sustainability, increased commercialisation and investment in research and development.	N/A
225	Future Food Systems CRC	2019-2029	35.00	To analyse local challenges and design integrated solutions that are grounded in collaborative business cultures: farms, greenhouse complexes, food factories, freight forwarders and services providers, linked by smart logistics in well-planned mosaic landscapes.	N/A
224	Blue Economy CRC	2019-2029	70.00	To pave the way for innovative, commercially viable and sustainable offshore developments that will	N/A

				see rapid increases in marine renewable energy output and seafood production.	
223	SmartSat CRC	2019-2026	55.00	To build Australia's space industry through creation of the next generation of space-technologies and professionals and establish a nationally coordinated ecosystem of space research-industry collaboration.	N/A
222	Future Battery Industries CRC	2019-2025	25.00	To expand Australia's battery minerals and chemicals production, develop opportunities for specialist battery manufacture, support the deployment of batteries to households, communities and industry, and optimise the circular economy for the use and re-use of battery systems.	N/A
221	Digital Health CRC	2018-2025	55.00	To improve the health and healthcare of Australians through collaborative R&D that combines clinical expertise, data and information telecommunications technologies to empower consumers.	N/A
220	Future Fuels CRC	2018-2025	26.25	To transition energy infrastructure to a low-carbon economy using fuels such as hydrogen and biogas.	N/A
219	End Food Waste CRC	2018-2028	30.00	To reduce food waste throughout the supply chain, transform unavoidable waste into innovative high-value co-products and engage with industry and consumers to deliver behavioural change.	<ul style="list-style-type: none"> Previously named the Fight Food Waste CRC.

OFFICIAL

No.	CRC	Period	Funding (\$m)	Objective	Previous iterations (where relevant)
218	MinEx CRC	2018-2028	50.00	To create new opportunities for mineral discovery by delivering: more productive, safer and environmentally friendly drilling methods; new technologies for collecting data while drilling and exploration data on never before sampled deposits.	N/A
217	Cyber Security CRC	2018-2024	50.00	To deliver solutions that increase the security of critical infrastructure and provide cyber security solutions that benefit businesses and their customers.	N/A
216	iMove CRC	2017-2027	55.00	To develop new products that provide real-time, end-to-end visibility of the transport network. This will result in better predictive capability, eliminate network downtime and offer scalable solutions and improve Australia's competitiveness in the global network management market.	N/A
215	Food Agility CRC	2017-2027	50.00	To deliver commercial value and build capability across the food value chain and develop and use digital technologies including models for sharing data across the food value chain.	N/A
214	CRC for High Performance Soils	2017-2027	39.50	To address the critical barriers to high performance soils by developing real solutions, with a focus on how these solutions can be adopted throughout the farming community. It will co-create with farmers, industry and researchers a suite of practical solutions for on-farm application by farmers.	N/A

OFFICIAL

No.	CRC	Period	Funding (\$m)	Objective	Previous iterations (where relevant)
213	CRC for Honey Bee Products	2017-2022	7.00	To resolve industry problems that are limiting both the value and expansion of the Australian honey bee products industry. It also proposes to develop bee disease insurance policies that seek to address a major global threat to the industry.	N/A
212	CRC for Developing Northern Australia	2017-2027	75.00	To increase the competitiveness and productivity of industry in Northern Australia to develop research across the food, tropical health and Agriculture sectors.	N/A
211	Innovative Manufacturing CRC	2015-2022	40.00	To accelerate Australia's rapid transition into high value, high knowledge-based manufacturing through leadership, support and facilitation of innovative manufacturing organisations and entrepreneurs as the visible leaders of the manufacturing sectors of the future.	N/A
210	CRC for Optimising Resource Extraction	2015-2021	34.45	To develop an advanced manufacturing approach for mining; targeting operational inefficiencies, reducing energy use, and enabling economic recovery of lower-grade ore deposits.	<ul style="list-style-type: none"> No. 183 - CRC for Optimising Resource Extraction - 2010-2015
209	Antarctic Climate and Ecosystems CRC	2014-2019	25.00	To address key scientific questions, including how Antarctica drives global climate, and how the pace and nature of change will affect the wellbeing and economic interests of Australians.	<ul style="list-style-type: none"> No. 171 - Antarctic Climate and Ecosystems CRC - 2010-2014 No. 134 - CRC for Antarctic Climate & Ecosystems - 2003-2010 No. 63 - CRC for Antarctica and the Southern Ocean - 1997-2003
