I. Assessment criteria

We will assess your application based on the weighting given to each criterion and against the indicators listed beneath each criterion. We will only consider funding applications that score highly against each criterion as these represent best value for money.

The amount of detail and supporting evidence you provide should be commensurate with the project size, complexity and grant amount requested. You should define, quantify and provide evidence to support your answers.

I.1. Assessment criterion 1 (50 points)

Your response is limited to 5000 characters including spaces and does not support formatting.

Describe how your project will contribute to Australia's emissions reduction target to 2030, 2035 and 2050 (50 points).

You must demonstrate this through identifying your:

- a. project's emissions abatement potential. This must detail:
 - the potential scope 1 emissions reductions from trade-exposed Safeguard facilities to be delivered by the project in tonnes of carbon dioxide equivalent per annum (tCO₂-e p.a.). You must include the basis for your calculations with sufficient detail for them to be replicated and validated
 - the expected timing for delivery of any emission reductions and the impact of grant funding in reducing this (if relevant)
 - how the project relates to any other projects or upgrades planned for the facility.
- b. corporate and/or facility emission reduction plans. This should include:
 - a summary of any existing corporate or facility emission reduction commitments
 - a summary of your obligations under the Safeguard Mechanism
 - an explanation of how this project supports or accelerates your plans to meet relevant corporate and regional commitments.

You may note any additional potential scope 2 or 3 emission increases or reductions obtained by this project as these may be taken into account as part of your overall corporate and/or facility emission reduction plans.

You should note that projects that have received a final investment decision (subject to being awarded grant funding) and are weighted towards capital works that directly result in emissions abatement would be expected (all things being equal) to score higher than those projects that are yet to complete preparatory and planning steps such as undertaking feasibility and FEED studies.

You may also attach your Corporate Transition Plan to support this assessment criterion.

I.2. Assessment criterion 2 (10 points)

Your response is limited to 5000 characters including spaces and does not support formatting.

Capacity, capability and resources to deliver the project (10 points).

You must demonstrate this through:

- a. describing your resources, including personnel, physical resources and facilities that you will use to deliver the project including your access, and future access to, any land, infrastructure, capital equipment, technology, intellectual property and required regulatory or other approvals required to deliver the project.
- b. submitting your project plan, including how you plan to:
 - manage the project including scope, funding, governance, implementation methodology and timeframes
 - reach Final Investment Decision, including when you completed, or how you plan to complete, steps such as pre-feasibility, feasibility and Front End Engineering and Design (FEED) studies
 - mitigate delivery risks (including national security, work, health and safety, financial, land access, technical and environmental risks)
 - secure required regulatory or other approvals.

You will be required to attach your project plan to your application and include a project budget, any planning, design or engineering reports, project risk assessments or reports and risk mitigation, and funding strategy.

I.3. Assessment criterion 3 (40 points)

Your response is limited to 5000 characters including spaces and does not support formatting.

Impact of the grant funding (40 points).

You must demonstrate this through identifying:

- a. any broader regional, social, economic and environmental benefits of your project. For example explaining how the project will support:
 - your existing workforce to develop, including any skills and training support
 - new and retraining workers to develop skills and experience in the sector, especially any measures to increase women's participation and/or First Nations participation and accommodate workers with a disability
 - and be informed by ongoing engagement or collaboration with local First Nations representatives.
- b. how your project will support regional and sectoral transformation, for example:
 - the project's contribution to Australia's sovereign capability, domestic clean energy supply chains and local manufacturing sector
 - the project's capacity to demonstrate new technology, processes and practices that could be replicated elsewhere in Australia and overseas

Powering the Regions Fund - Safeguard Transformation Stream Round 2 application requirements

- support your region to move towards net zero, such as increasing the local supply of clean fuels or contributing to regional development
 - the project's location in, or capacity to support investment in, a Net Zero Economy Authority priority focus area.
- c. how your project represents value for money, including increased leverage of private and state investment.
